

ABSTRACT OF THE DISCLOSURE

METHOD AND SYSTEM FOR COMPLETING E-MAIL TRANSMISSIONS

A method and system for completing e-mail transmissions
5 detects when an e-mail user likely intends to provide an
attachment and prompts the user to provide the attachment if it
is not attached. A parser parses the e-mail message for keywords
that indicate that the sender likely intends to provide an
attachment, then the e-mail program prompts the user to provide
10 the attachment if the attachment is not attached. The parser may
also decompose sentences to provide matching of common phrases
or meanings with phrases or meanings that indicate that the
sender likely intends to provide an attachment.
